PROFESSIONAL SUMMARY:

Computer Science Engineering student specializing in **Frontend development, UI/UX design, and Web application development**. Skilled in **HTML, CSS, JavaScript, React, Figma, and building user-focused digital products**. Experienced in developing AI-driven and community-focused project concepts with strong attention to usability, problem-solving, and clean interface design.

EDUCATION:

SRM Easwari Engineering College - B.E. Computer Science and Engineering | 2023 - 2027

CGPA: 8.60

Prince Matriculation Higher Secondary School | 2020 - 2023

Percentage: 78%

TECHNICAL SKILLS:

Programming Languages: Java, C++, C

Frontend Development: HTML, CSS, JavaScript, React

UI/UX and Design Tools: Figma, Adobe XD, Wix Studio, WordPress, Wireframing, Prototyping

Databases and Backend Basics: MySQL, MongoDB

Developer Tools: Git, GitHub, Vercel

PROJECTS:

1) MapMyMemoir - Location-Based Journaling Platform

- Designed and developed a location-aware journaling platform that allows users to connect personal memories with real-world locations.
- Implemented map-based memory visualization using coordinates extracted from Google Maps URLs to improve location accuracy and user experience.
- Built core workflows for memory creation, public Explore entries, location integration, and user-focused interface design.
- Strengthened skills in frontend development, geolocation-based features, data handling, and end-to-end product thinking.

Technologies: HTML, CSS, JavaScript, Google Maps API, GitHub, Vercel

2) SkillLoop - Community Skill-Sharing Platform | Personal Project, In Progress

- Developing a locality-based platform that connects learners and tutors to teach and learn practical skills within their nearby community.
- Designed discovery, booking, profile, and trust-building flows to support a smooth learner-to-tutor experience.
- Planned location-aware discovery, secure user authentication, Firestore-based data storage, ratings, and scalable deployment workflow.
- Focused on clean UI, responsive layouts, and user-centered product design for community learning use cases.

Tech Stack: React, CSS, Firebase Auth, Firestore, Cloud Functions, Google Maps API, Vercel, GitHub

3) MiraLook - AI-Driven Personal Styling Assistant | Personal Project, In Progress

- Designing an AI-based styling assistant that provides personalized outfit, grooming, and skincare recommendations based on body type, occasion, preferences, and user inputs.
- Created product flows for user onboarding, profile memory, occasion-based styling, AI visual previews, and wishlist-style saving.
- Developed recommendation logic concepts to make fashion suggestions more personalized, explainable, and easy for users to follow.
- Applied Figma-based wireframing, prototyping, AI product design, and UX research thinking to improve clarity and user confidence.

Tools and Skills: Figma, AI Product Design, Wireframing, Prototyping, Personalization Logic, AI Image Generation Concepts

SOFT SKILLS:

Teamwork, Problem Solving, Leadership, Event Management, Multitasking, Organization, Time Management
